

**Harish Yadav**  
Senior iOS Developer

Dear Hiring Manager,

I am writing to express my strong interest in the iOS Developer position. With over 12.5 years of experience in designing, developing, and delivering high-quality iOS applications, I am excited about the opportunity to contribute my skills to a forward-thinking organization.

Throughout my career, I have worked extensively with Swift and Objective-C, building scalable and high-performance mobile applications across enterprise, telecom, IoT, and consumer domains. I have hands-on experience across the full iOS development lifecycle—from requirement analysis and architecture design to App Store deployment and ongoing maintenance. I am particularly skilled in modern iOS architectures such as MVVM and have collaborated closely with product managers, designers, backend engineers, and QA teams in Agile environments.

In my recent roles, I have led feature development, improved application performance, integrated APIs and SDKs, and mentored junior developers through code reviews and technical guidance. I take pride in writing clean, testable code and in delivering reliable solutions that align with business goals and user needs.

I am highly motivated, adaptable, and passionate about building impactful mobile products. I believe my technical expertise, problem-solving mindset, and strong collaboration skills make me a good fit for this role. I would welcome the opportunity to discuss how I can add value to your team.

Thank you for your time and consideration.

Sincerely,  
Harish Yadav
