WORK EXPERIENCE

Tekarch Technologies Pvt Ltd | Jul 2024 - Nov 2024

SENIOR IOS DEVELOPER

- Collaborated closely with Product Management and UI/UX teams to convert business requirements into scalable, high-quality technical solutions.
- Designed and implemented access validation workflows for premium airport lounge entry, enabling same-day airline ticket and Platinum credit card verification, capacity-based access control, guest eligibility rules, and paid validation with complimentary member entry.

Yan IT Solutions Pvt Ltd | Nov 2017 - Jan 2024

SENIOR IOS DEVELOPER

- Led end-to-end development and launch of enterprise iOS applications using Swift, driving increased user engagement through scalable, high-performance solutions.
- Designed and enhanced modular iOS architecture leveraging MVVM, Singleton, Delegate, and Notification patterns, improving maintainability and system performance.
- Integrated Beacon (IoT) technology to deliver real-time alerts, task tracking, and inventory management.
- Analyzed user and business requirements to design efficient software solutions and continuously improve system architecture.
- Implemented automated release and deployment processes, streamlining App Store submissions and reducing release effort.
- Collaborated cross-functionally with Product, UI/UX, QA, and backend teams to debug issues and deliver reliable features.
- Participated in Agile/Scrum ceremonies and utilized JIRA for sprint planning, estimation, and defect tracking.

Reliance Communications LTD | Jan 2016-Nov 2017

SENIOR IOS DEVELOPER

- Served as a Senior iOS Developer, owning low-level planning, system design, effort estimation, and hands-on development.
- Continuously improved system architecture to enhance scalability, performance, and maintainability.
- Developed self-service iOS applications for account management and transactions, integrating REST APIs, secure session handling, and optimized JSON parsing.
- Built location-based tracking solutions using CoreLocation, enabling real-time updates with battery-efficient background services and consent-based location sharing.
- Implemented real-time messaging and audio communication using XMPP, supporting presence management, client-server communication, and data synchronization.
- Collaborated within Agile teams, conducted code reviews, and managed applications through App Store submission and maintenance.

Value c Consulting | May 2015 - Dec 2015

SENIOR IOS DEVELOPER

- Developed enterprise iOS applications for CRM and Employee Self-Service platforms, delivering scalable and user-focused solutions.
- Designed reusable UI components, implemented SQLite-based local data storage, and managed App Store deployment and releases.

The Development Media | Nov 2013 - Apr 2015

JR.IOS DEVELOPER

- Independently developed and launched an iOS vehicle leasing application, owning the complete lifecycle from requirements gathering and UI design to development, testing, and App Store deployment.
- Implemented key features including vehicle browsing, advanced search filters, detailed specifications, leasing cost calculations, notifications, and in-app quote requests, delivering a seamless user experience.
- Collaborated with client stakeholders to refine requirements and deliver a fully functional, production-ready application aligned with business goals.

Appetals Solutions | Jan 2013 - Oct 2013

JR.IOS DEVELOPER

- Developed the Forbes Magazine iOS application for iPad, implementing content browsing and social sharing features.
- Managed database integration, UI design, and App Store deployment, ensuring a smooth and compliant release.

Itgurussoftware pvt ltd | Mar 2011 - Jan 2013

JR.IOS DEVELOPER

- Delivered multiple iOS applications across social networking, travel, utilities, and enterprise domains, ensuring high-quality and scalable solutions.
- Managed end-to-end development lifecycles, including UI design, development, testing, and App Store deployment.
